DETAILED ACTION

Priority

Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been received.

Information Disclosure Statement

Receipt is acknowledged of an Information Disclosure Statement, filed 8/22/06, which has been placed of record in the file. An initialed, signed and dated copy of the PTO-1449 form is attached to this Office action.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Axinti et al. 4,688,468.

Axinti et al. discloses a pressure fluid operated percussion device comprising a frame 15 allowing a tool 18 to be arranged therein, means for feeding pressured liquid to the percussion device and for returning pressure liquid to a liquid tank 6, and means for producing a stress pulse in the tool by utilizing pressure of the pressure liquid, wherein the percussion device comprises a working pressure chamber (d,e), a piston 1, a charging pressure chamber (f) facing the tool; wherein the piston is provided with a pressure surface (c,b) facing the working pressure chamber and on the side of the pressure charging chamber a pressure surface (a) facing the tool; a pressure

liquid source 6 connected with the working pressure chamber d via (g), and means for intermittently feeding to the charging pressure chamber via (i), pressure liquid whose pressure enables the piston to be pushed towards the working pressure chamber as claimed (claim 1); the working chamber is connected to a pressure liquid source 6 (claim 4); and a pressure accumulator 5 connected with the working chamber (claim 5).

With respect to claim 2, it is deemed that Axinti teaches wherein the means for feeding pressurized liquid to the working chamber are arranged to feed the liquid such that the pressure in the working chamber remains substantially constant during operation of the percussion device as shown in col. 1, lines 44-53.

With respect to claim 3, Axinti discloses equal pressure of pressurized liquid is fed to the working and charging chambers, and wherein the pressure surfaces of the piston are dimensioned such that a sum of forces being formed pushes the piston into its backward position as shown in the Abstract.

Additional References Cited

The cited prior art is made of record but has not been relied upon in the rejection of claims. However, the prior art is considered pertinent to applicant's disclosure in that they show pressure fluid operated percussion devices.
